Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement.

1. The following documents (D1,D2) are referred to in this communication; the numbering will be adhered to in the rest of the procedure:

D1: EP-A-1 074 243 (AUSIMONT SPA) 7 February 2001 (2001-02-07)

D2: EP-A-0 390 206 (AUSIMONT S.R.L; AUSIMONT S.P.A) 3 October 1990 (1990-10-03)

2. Novelty (Article 33(2) PCT)

- The subject-matter of present claims 1-15 is considered as novel over the cited prior art for the following reasons (Article 33(2) PCT):

None of the cited documents refers to the use of perfluoropolyether phosphates as stabilizing agents for polyphenols in cosmetic and/or dermatological compositions for topical application (see independent claim 1) and to a cosmetic and/or dermatological composition comprising as active substances, polyphenols, characterized by containing as stabilizing agent an effective amount of at least one perfluoropolyether phosphate (see independent claim 5).

3. Inventive Step (Article 33(1),(3) PCT)

- The subject-matter of present claims 1-15 is considered as being inventive for the following reasons (Article 33(1),(3) PCT):

- The problem to be solved by the present application is to provide a new stabilizing agent for the polyphenols, allowing the achievement of cosmetic or dermatological formulations for topical use (see description on page 4, lines 10-12).

- The solution proposed in the present application consists in the use of perfluoropolyether phosphates as stabilizing agents for polyphenols in cosmetic and/or dermatological compositions (see independent claim 1) and a cosmetic and/or dermatological composition comprising as active substances, polyphenols, characterized by containing as stabilizing agent an effective amount of at least one perfluoropolyether phosphate (see independent claim 5).

**INTERNATIONAL PRELIMINARY
REPORT ON PATENTABILITY
(SEPARATE SHEET)**

International application No.

PCT/EP2004/009667

- Document D1, which is considered as the closest prior art, describes a cosmetic base composition (premix) comprising a perfluoropolyether phosphate, a solvent and water. The composition may comprise alcohols (Cf. D1, the whole document).

- The difference between the teaching of the closest prior art and the claimed subject-matter appears to be the presence of a polyphenol in the claimed cosmetic composition and the stabilizing effect on said polyphenols by using perfluoropolyether phosphates.

- Starting from D1, the skilled person had no incentive to come to the claimed solution and therefore, the subject-matter of present claims 1-15 is considered as inventive according to Article 33(1),(3) PCT.

4. Industrial Application (Article 33(4) PCT)

- The subject-matter of present claims 1-15 is considered to be industrially applicable; claims 1-15 therefore, satisfy the criterion set forth in Article 33(4) PCT.
